

# INSTRUCTIONS: 3D Love Bugs

## SUPPLIES

- White construction paper
- White glue
- Scissors
- Thin plastic acrylic sheet or translucent paper for extra wings (optional)

## INSTRUCTIONS

1. Print the instructions & bugs provided.
2. Cut out the bugs. Cut out the legs & antennae (optional).
3. Glue on the legs & antennae to the back of the bugs. This is optional, the bugs are just as cute without legs and antennae! Using the wing patterns, layer a sheet of plastic or translucent paper on top and cut out the optional extra wings.
4. Fold the bugs in half and then open up again to give them some depth. If you chose to make the translucent wings, food them in half and attach with a dab of white glue.
5. Your 3d Love Bugs are complete! They look great when glued or taped to the Love Bug Banner & Flowers. You can also "invisibly" hang them from the banners using clear filament. We used a string needle, threading it with the filament through the bugs. Tie a good knot and trim the filament. Secure the other end of the filament to the banner.
